## PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of hands-on experience building scalable web applications and integrating APIs. Skilled in React, Node.js, and Python, with a strong focus on creating responsive, user-friendly interfaces and efficient backend systems. Experienced in delivering real-world solutions across multiple projects, including subscription platforms and e-commerce systems. Passionate about clean code, performance optimization, and solving practical business problems.

---

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, SQL, HTML, CSS, C

**Frontend:** React.js, Tailwind CSS, Responsive Design

**Backend:** Node.js, Express.js, Flask, REST APIs

**Mobile Development:** Flutter, Dart

**Databases:** MongoDB, MySQL, PostgreSQL, SQL Server

**Tools & Systems:** Git, Linux, Windows Server, TCP/IP Networking

---

## PROJECTS

### Bingwatune.co.ke — Frontend Developer

*Tech: React, Tailwind CSS, REST APIs*

- Developed a React-based application for receiving and processing customer subscription data
  - Integrated REST APIs to support Skiza tune activation workflows
  - Implemented form validation, error handling, and asynchronous request handling
  - Built interactive dashboards to monitor subscription status and activation logs
  - Improved user experience through responsive design and optimized rendering
- 

### E-Commerce Platform — Full Stack Developer

*Tech: React.js, Node.js, MongoDB, Tailwind CSS*

- Built a full-stack e-commerce application with authentication and shopping cart functionality
  - Designed and implemented secure REST APIs for product management and order processing
  - Integrated payment functionality and user session handling
  - Developed a responsive and modern user interface
- 

### **HERO School Management System — Software Developer**

*Tech: Node.js, Express.js, MongoDB*

- Developed a school management system with role-based access control
  - Designed RESTful APIs for managing students, teachers, and administrative operations
  - Implemented secure authentication and structured backend architecture
  - Built scalable modules to support future system expansion
- 

## **PROFESSIONAL EXPERIENCE**

### **Software Developer — Edion Limited**

*November 2023 – Present | Nairobi, Kenya*

- Develop and maintain web and mobile applications using React, Python, and Tailwind CSS
  - Design and implement database solutions using MongoDB and SQL-based systems
  - Build RESTful APIs and backend services for client applications and integrations
  - Collaborate with clients to gather requirements and deliver tailored software solutions
  - Optimize application performance and ensure responsive user interfaces
- 

### **ICT Intern — Office of the Attorney General**

*May 2022 – August 2022 | Nairobi, Kenya*

- Provided network support for over 50 users, ensuring high system uptime
  - Installed and configured networking equipment including routers and switches
  - Troubleshoot hardware and software issues, improving response times
  - Performed system maintenance and infrastructure support tasks
- 

## **EDUCATION**

### **Bachelor of Science in Business Information Technology**

Murang'a University of Technology

Graduated: September 2023

---

## CERTIFICATIONS

### Software Engineering Certificate — ALX Africa

- Completed project-based training in software development
- Gained experience in backend and frontend technologies, algorithms, and system design
- Built and deployed multiple real-world applications using modern tools

### Power Learn Project (PLP)

- Trained in mobile application development
- Built cross-platform applications using modern frameworks
- Applied UI/UX best practices, API integration, and state management
- Worked with version control using Git and GitHub

---

## KEY ACHIEVEMENTS

- Developed and deployed multiple real-world applications across web and mobile platforms
- Built a functional subscription system integrating external APIs for Skiza tune activation
- Delivered scalable and user-friendly solutions for both academic and commercial use
